

# GETTING STARTED EARLY: MAPPING THE ROAD TO LITERACY

## Breakout Session Titles and Descriptions

### DAY 1: WEDNESDAY

#### **The Track to Targeted Intervention: An Introduction to Fun in Focus**

Fundations® in Tier 2 just got a whole lot easier to implement! Learn how a structured intervention lesson aligned to Tier 1 instruction can make all the difference for those students who need additional practice. Data analysis, appropriate grouping, and intentional planning can set the stage for success. This session will also explore the MTSS/RTI frameworks and the “why” behind the practice and assessment features of Fun in Focus™.

#### **Orientation to Fun in Focus**

Fun in Focus: The Fundations® Tier 2 Intervention Kit is for teachers supporting students who receive Fundations in Tier 1 and also need small-group targeted support. This session will provide an opportunity for teachers to become familiar with the Fun in Focus lessons and materials.

If you are familiar with Fundations’ previous targeted instruction resources, you will love the streamlined lesson planning and instruction of Fun in Focus™ without sacrificing the focus on meaningful practice and fluency. If you are just beginning with Fundations’ targeted instruction, you will appreciate the practical layout that leaves you more time for intentional planning and delivery to students who struggle to reach mastery.

### DAY 2: THURSDAY

#### **Take a Tour! Fundations Readers**

Fundations® Readers are a set of beautifully illustrated readers with 95%+ decodability aligned to the Fundations scope & sequence and grade-level curriculum themes. Join us for a behind the scenes look at how these specialized texts are created, take a tour of the Fundations Readers for Levels K and 1, and talk through implementation suggestions for how to get the most out of these in both Tier 1 and Tier 2 settings.

#### **Takeoff with FUN Updates**

Takeoff and launch your new school year with all the tools Fundations® has to offer. Bring your own device (BYOD) for a hands-on journey into the world of FUN updates, including FUN HUB® Practice for students and the Unit Test Tracker. Also, learn about the plans for integration with Clever.
