Introducing FUN HUB® Practice

Our brand new FUN HUB® Practice, designed especially for students, provides four highly interactive and engaging activities each week in the dynamic, online format these digital natives have come to expect and love. Each activity matches up to a newly taught concept, helping students apply their Foundations lessons as part of their warm-up activities in small groups or independently. Teachers will be able to monitor and track each individual student's progress and skill mastery using valuable data insights to inform daily lessons and plans for small-group instruction.
